#### **DETAILED ACTION**

##### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/1/08 has been entered.

#### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Saralino on 11/6/08.

The application has been amended as follows:

In the Specification:

On page 1 of the specification, above line 1, insert -- Background of the Invention

--.

On page 3 of the specification, in between lines 21-22, insert -- Summary of the Invention --.

On page 6 of the specification, in between lines 6-7, insert -- Brief Description of the Drawings --.

On page 7 of the specification, above line 1, insert -- Detailed Description of Preferred Embodiments --.

***Allowable Subject Matter***

3. Claims 1-47 are allowed.
4. The following is an examiner's statement of reasons for allowance: The prior art does not specifically disclose the combination of limitations of claim 1: an autostereoscopic display comprising: a pixellated transreflective spatial light modulator comprising at least one first region, at least one second region, and a plurality of pixels; a backlight; an arrangement for substantially preventing transmission of light through said at least one first region of said modulator to an autostereoscopic viewing region of said display; and a controller for setting at least some of said pixels of said at least one first region to a first predetermined transmissivity and for setting at least some of said pixels of said at least one second region of said modulator to a second predetermined transmissivity less than said first transmissivity, said controller being further arranged to set said at least some of said pixels of said at least one second region of said modulator to a transmissivity according to a user selected crosstalk level for assessing crosstalk due to a change in the amount of reflected light relative to transmitted light in conjunction with the transreflective spatial light modulator by the appearance of said at least one first and second regions. Independent claim 24 is patentable for at least

similar reasons as claim 1. Also, peruse pages 1-5 of applicant's arguments submitted on 10/1/08.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
